### Fund Aim

Financial Science is a systematic fund focused on liquid securities. The core algorithmic engine applies machine learning to a wide range of fundamental, momentum and other data to select undervalued stocks at reduced volatility across a risk adjusted portfolio.

This aims to allocate capital to:

- \* typically 40 - 100 long equity positions or bonds:
- \* high quality businesses with sustainable profit and cashflow
- \* businesses without significant leverage
- \* companies at attractive valuations
- \* short term Treasury bonds
